

## Process — Night close, finance accept, books

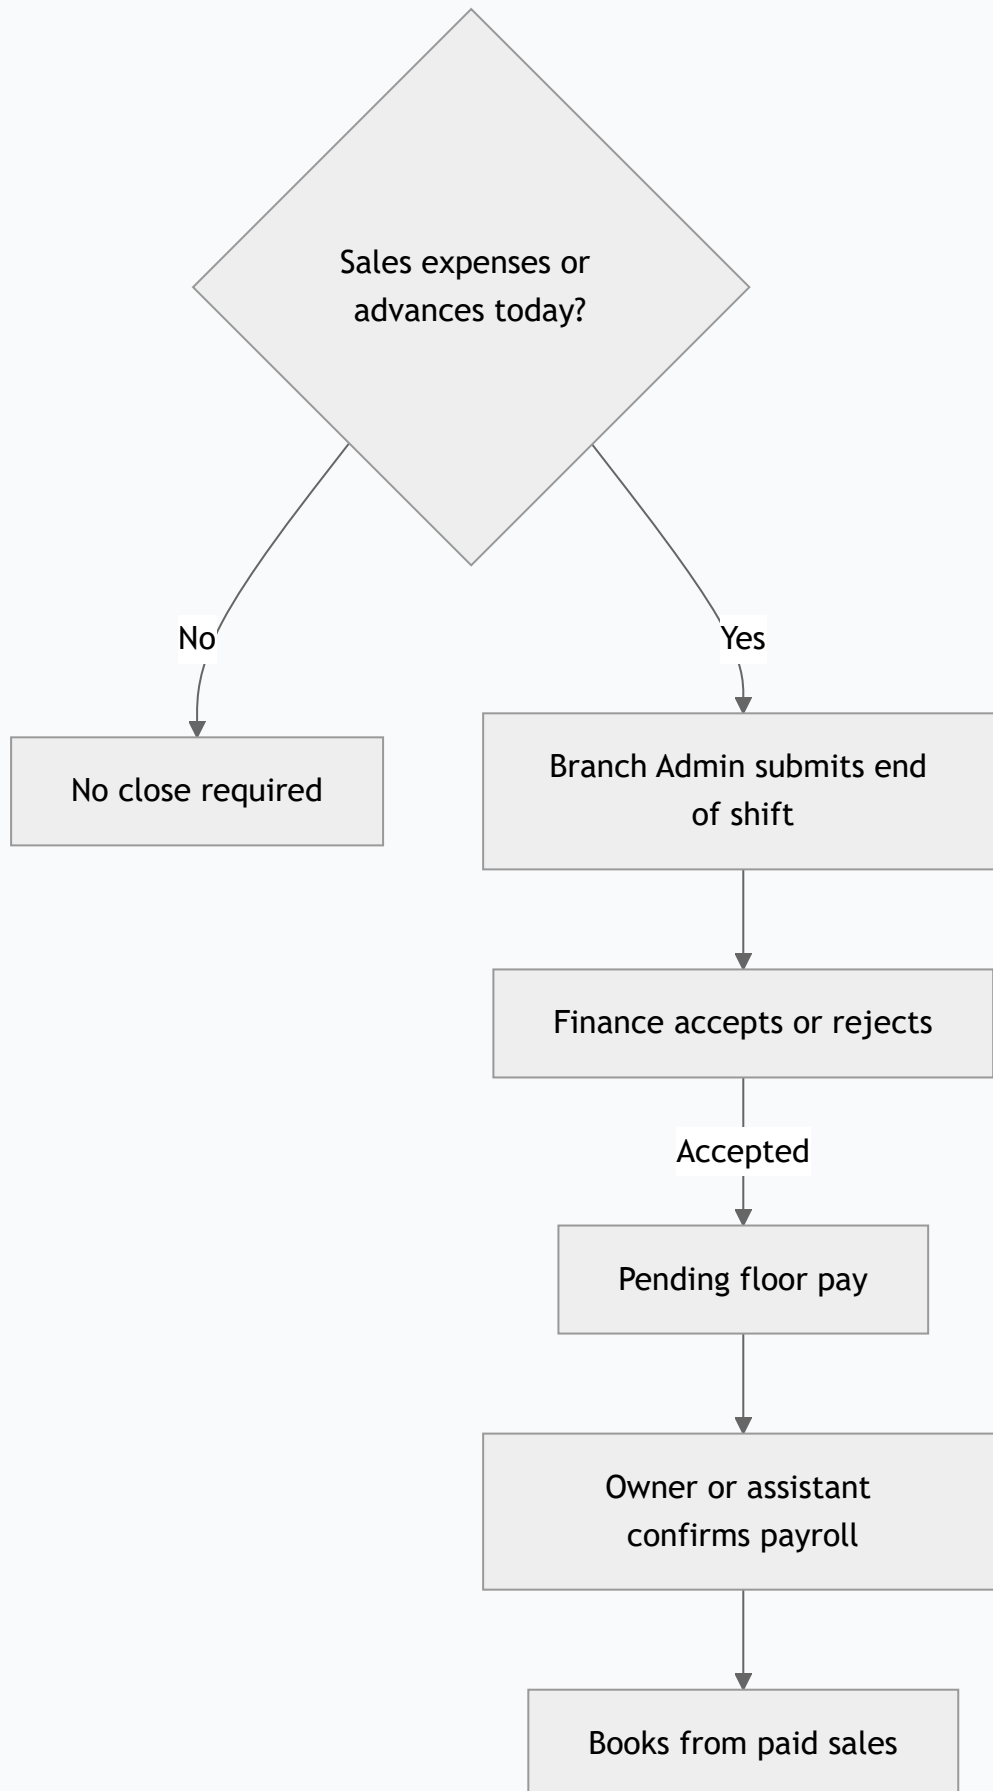

End of shift → Finance accept → pending floor → confirm pay → books.

### Process — Night close, finance accept, books

---

## Night close loop

Attestation unlocks payroll — it does not invent pay.

## End of shift

**As** Branch Admin

**I want** to submit end of shift when the day had activity

**So that** cash / GCash / card are attested against what checkout sold

- ☒ Close only offered when there were sales, expenses, or cash advances
- ☒ Total sales = paid checkout (wash + detailing + merch), never advance repayments
- ☒ Carwash salary preview = wash pool only
- ☒ If numbers differ from the baseline, a reason is required
- ☒ Only one open close per branch per day

**As** Owner or assistant

**I want** to accept or reject submitted closes

**So that** accepted days unlock pending floor pay

- ☒ Review happens in Finance shift close
- ☒ Accept notifies the people who confirm payroll
- ☒ Profit & loss still follows paid sales, not typed overrides

**As** Owner

**I want** pending floor pay visible before I confirm payroll

**So that** I never pay without an accepted close when the hard gate is on

- ☒ List shows accepted days without a floor run yet
- ☒ Side-by-side: close attested pesos vs checkout proof pesos
- ☒ Hard gate blocks confirm until accepted or locked
- ☒ After floor posts, coverage shows as posted

## Finance books

**As** Owner, assistant, or Investor

**I want** branch- and date-scoped books

**So that** net profit reflects paid sales and posted expenses

- ☒ Loads sales summary, profit & loss, and expenses
- ☒ No profile → no accidental all-branch data
- ☒ Load failure shows a clear retry message
- ☒ Reports live under Finance

**As** assistant

**I want** to submit branch expense reports

**So that** approve → pending payment → mark paid hits books once

- ☒ Draft/submit with branch access
- ☒ Approve lands pending payment first
- ☒ Mark paid posts to books
