

Role — Customer & guest

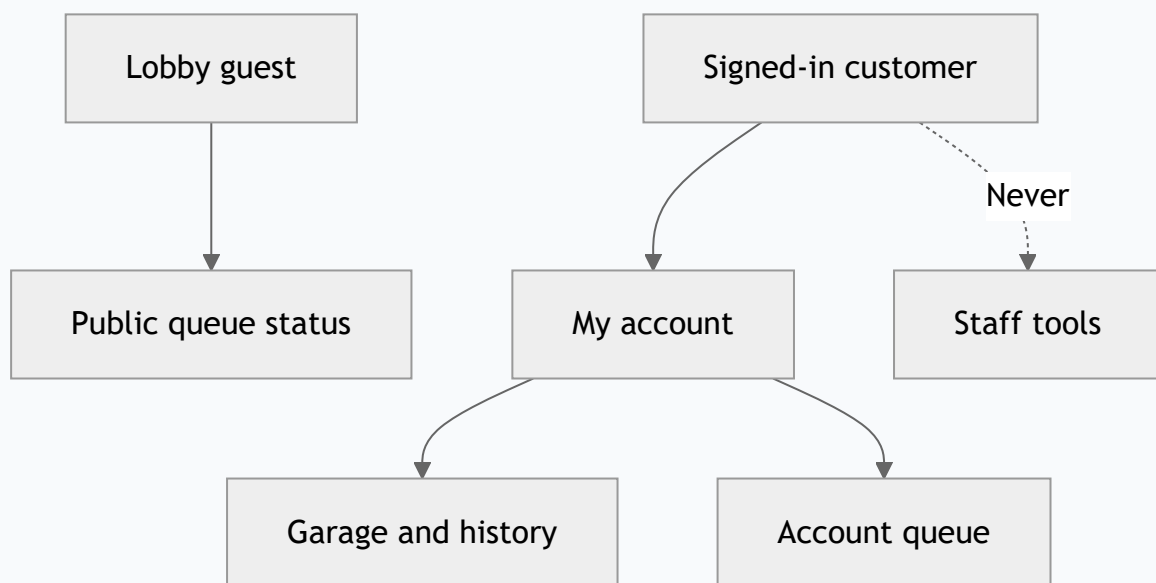

Account, garage, history. Guests see lobby queue. Never staff tools.

Role — Customer & guest

Opens first: My account · **Main job:** Garage, history, queue status

Customer & guest

Account for signed-in customers; public queue for the lobby.

Stories

As a customer

I want phone sign-in / signup / claim

So that visit history stays on one customer profile

☒ Clear steps: phone → name/plate → birthday perk → password

☒ Team Lead can pre-create an account that still needs a password

As a signed-in customer

I want vehicles and past visits

So that I recognize my plates at the bay

☒ Garage and history in the account app

As a guest in the lobby

I want public queue status by branch

So that I see progress without logging in

☒ Public queue shows only safe status info

As a customer

I want My account as home

So that I never open staff Payroll / People / POS

☒ Home is My account

☒ Staff operations stay blocked
